

# Welcome @ Foodplaza!

Wanna eat in? Help the environment and please use tableware.

Wanna eat out? Let us tell you a bit more about some of the disposables we use. We work with our partner Bunzl and use their 'Believe' products: Why are Believe Disposables more durable than normal disposables? That has to do with the way they have been processed in the past (recycled), can be processed after use (compostable) or with the natural material from which they are made. The Believe Disposables are produced from various natural materials.

Believe Recycled PET: Recycled PET products use at least 51% recycled material. Recycled PET is a form of circular economy: a product becomes the raw material for a new product without being burned.

Believe compostable: Compostable. Materials are broken down into compost or serve as energy for the micro-organisms to make compost.

Believe Renewable resources: made from at least 99% renewable sources, such as trees, shrubs, plants, crops, algae etc.

Enjoy your meal and don't forget to separate your waste when you finished eating!
